Your initial plan was to discharge the patient if his workup was normal.

The patient's shortness of breath is still present, and he is awaiting the results of testing done in the ED.

Your Task:

1. Reassess and the update
2. Discharge the patient from the Emergency Department.
3. This simulation is focused on communication. This case is not an assessment of your medical decision making. You do not need to order additional emergency department tests or admit this patient.
4. * When you are finished, you can tell him that the nurse will be in shortly to give him his paperwork and take out his IV
